

THINGS TO CONSIDER TO PRIOR TO OUR MEETING:

Before meeting with your Designer, you may want to consider the following things. Taking time to think about these aspects of your project may help you to better communicate your needs and desires to your designer.

1. For whom is the space being designed?
2. What activities take place in the space?
3. How long do you plan to occupy the space?
4. When would you like to begin working on the project? When does the project need to be completed?
5. What is your budget for this project?
6. Are you relocating, or will you be residing in the space during the project?
7. What image or feeling would you like the space to project?
8. Do you have furniture, artwork, collections, heirlooms or other objects that you would like to be a key part of the design?
9. What do you currently dislike about the space? What isn't functioning for *you*?
10. What is your favorite aspect of the space? What do you *not* want to change?

*We look forward to meeting with **you!***
